Office Action Summary

Art Unit: 1774

1. The restriction requirement of Paper No. 6 is adhered to and made final for the reasons of record.
2. Claims 10-14 are rejected under 35 USC 112 (first paragraph) as being broader than the enabling disclosure as a result of applicants' failure to recite that the "coating" comprises metal.
3. Claims 10-14 are rejected under 35 USC (secondary paragraph) as being indefinite for the reasons set forth below:
 - A. Is the sheet of foil actually adhered to the surface of the base material as recited or is it actually adhered to the overlying adhesive?; and
 - B. Use of the term "transferring" in the last step is confusing since the foil is already adhered to the base material. It is suggested that applicants use their language from page 7, line 6 of their specification instead (i.e., "the foil being retained on said base material" after the applicator is removed).
4. Claims 10 and 14 are rejected under 35 USC 102(b) as being anticipated by the patent to Yokomizo (U.S.P. 4,225,641; see column 1, lines 53-55; column 2, lines 18-25, 55 and 56; column 3, lines 1-5, 47-52 and 61-65; and column 4, lines 6-11).
5. Claims 10 and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over the patent to Yokomizo.

Yokomizo teaches a method for manufacturing a sheet of material for use in arts and crafts wherein adhesive 6 is applied to a base material (e.g., feather or foam), foil comprising applicator 18 and metal 16 is adhered to the base material and the

applicator is removed. Placing this water-insoluble article in water would have no adverse effect on the article.

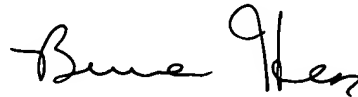

Honse (U.A.P. 4,307,531) is cited to show the state of the art of arts and crafts material employed in the making of fishing lines.

Applicants' attention is directed to the fact that the prior art fails to teach or suggest the subject matter of claim 11.
